About Graphite One Inc.

GRAPHITE ONE INC. (GPH: TSX-V; GPHOF: OTCQB) (the "Company") is a developing advanced graphite materials company. Planning continues on its Graphite One Project (the "Project"), whereby it could become an American producer of high grade Coated Spherical Graphite ("CSG") integrated with a domestic graphite resource. The Project is proposed as a vertically integrated enterprise to mine, process and manufacture high grade CSG primarily for the lithium-ion electric vehicle battery market and energy storage systems as well as other value-added products. As set forth in its Preliminary Economic Assessment, graphite mineralization, mined from the Company's Graphite Creek Property, would be processed into concentrate at a plant to be located on the Graphite Creek Property situated on the Seward Peninsula about 60 kilometers north of Nome, Alaska. CSG and other value-added graphite products would be manufactured from the concentrate at the Company's proposed advanced graphite materials manufacturing facility whose location is being investigated. The Company is progressing the Project's Pre Feasibility Study and intends to make a production decision once a Feasibility Study is completed.
